

Our customers

Our customers are private and public port operators in need for training on handling of goods and containers, safety, driving heavy machinery, operating cranes, lashing & securing, teamwork and operations communication.

"I'm very glad to say that my course at Ocha turned out to be a milestone in my career as a dock worker."

Ocha has extremely well equipped facilities and highly qualified instructors who use advanced teaching techniques and act like facilitators for the learning process. Because of that Ocha is able to offer modern and efficient training to dockworkers. Besides the instructors, the personnel are well trained and friendly too.

I highly recommend Ocha courses to anyone who wants to receive training in the field of port operations and dock work."

(Valdo Alvarenga, Brasil)

Our offer

- ✓ Practice-oriented training
- ✓ For port workers
- ✓ At our state-of-the-art training centre (Antwerp) or at your own premises

4 modules:

- ✓ Operational skills
 - simulator (straddle carrier, mobile crane, container crane)
 - cranes (vessel crane, mobile crane)
 - mobile equipment (forklift, reachstacker, reachtruck, tugmaster, etc.)
 - handling techniques (signalling loads, slinging loads, lashing & securing etc.)
- ✓ Port & labour organisation
- ✓ Safety & prevention
- ✓ Leadership

Nothing is fixed: our programs are adaptable to customer needs

Training in English, Dutch or French. For other languages a translator can be provided

Focus on "train the trainer": operators can teach their port workers themselves afterwards
